The book features genre-based tutorial sections, with step by step instructions for creating effective horror, comedy, drama, and suspense titling sequences. Tutorials for creating some of the most popular title sequences in blockbuster movies are included (Seven, The Sopranos, 24, The Matrix). Other tutorials teach you how to effectively use sound and VFX in your titles, and also included is instruction on editing your title sequence. These techniques, as well as chapters on the essentials of typography allow you to apply these lessons to your title sequence regardless of whether it's for TV, the web, or digital signage. Also included is a DVD with sample clips, as well as project files that allow you to refine the techniques you learned in the book. As an added bonus we've included 3 titling chapters from other Focal books, with

specific instructions on titling within certain software applications. Cover images provided by MK12, from The Alphabet Conspiracy. Learn more at [www.MK12.com](http://www.MK12.com)

Master the assistive strategies you need to make confident clinical decisions and help improve the quality of life for people with disabilities with this new essentials text. Based on the Human Activity Assistive Technology (HAAT) model developed by Dr. Cook, the book provides the most important coverage of the devices, services, and practices that comprise assistive technology and focuses on the relationship between the human user and the assisted activity within specific contexts. Case studies, illustrations of assistive devices, review questions, and well-developed learning objectives help you focus on the most important areas of assistive technology application. UNIQUE! OTA focus provides you with the specific information occupational therapy assistants need to know to implement and utilize assistive technologies. Comprehensive coverage includes all areas of assistive technologies. The AT industry A historical perspective on the industry Relevant legislation Issues of professional practice Service delivery in assistive technologies General purpose assistive technologies Specific areas of application for assistive technologies And more Content derived from market leader gives you similar chapters and organization to the Principles text, but has more of a focus on the practical skills and knowledge needed for the implementation of AT. Using a practical, case-based format, this superbly illustrated atlas by Dr. Paul Sorajja is a comprehensive collection of more than 130 professional experiences in treating structural heart disease. Organized by pathology, each case presents key clinical points for practitioners at all levels, from beginner to expert. Cases are provided by interventionalists and surgeons with extensive hands-on experience, and edited by experts in the field Includes more than 130 cases covering the full range of structural procedures formitral valve disease, aortic valve disease, prosthetic valve disease, congenital heart disease, hypertrophic cardiomyopathy, and tricuspid disease. Features more than 500 detailed instructional images for quick visual comprehension of essential aspects of each case. Each case includes clinical information, diagnostic images, bulleted learning points, and explanations and rationales for every step of the procedure. Covers catheter-based therapy for structural heart disease □ an increasingly important and rapidly growing therapy for valvular heart disease. Provides operator pitfalls and errors to help optimize success with each procedure. Allows practitioners at all levels of experience to explore, gain insight, and learn important keys for success. Whereas most insights concerning the dynamics of work groups come from North American or Western European environments, Hannah Titilayo

Seriki concentrates on teams operating within the complex societal context of sub-Saharan Africa. The author develops a multi-level theory of African teams' innovative performance and regards the team as a sub-system of the organisation, which is subjected to societal influences.
