Capitalism and the Alternatives _____ Jul 21 2021 Thirty years
after its global triumph, neo-liberalism is an abject
failure. While its advocates have succeeded in convincing
citizens that no other way is possible, that no left turn
can be made without an economic collapse, they have not
fulfilled their promises of a better world and the result
has been more inequality, insecurity, and speculation. Many
have sought solace in collective goals – nationalism, narrow
religion, and gender politics – while notions of universal
solidarity, idealism, and humanism have all but disappeared.
In Capitalism and the Alternatives Julius H. Grey seeks to
rehabilitate economic equality as a fundamental social goal
built on universal values such as individualism, liberty,
and even romanticism. To achieve this, he argues, it is
necessary to move away from national, ethnic, religious, and
even gender loyalties. The importance in each society of
common culture and widely accepted moral values, Grey
suggests, cannot be overstated. With its rampant political
correctness, the modern left seems to have lost sight of
morality and individual freedom. While most commentators
stake out a partisan position in their criticism, Grey's
notion of individual romanticism as the basis of a socially
progressive society and his stress on free will, culture,
classical education, and the right to dissent demand an
overhaul of both the right and the left. A fundamental
rethinking of the social, political, and economic
foundations of modern industrial society, Capitalism and the

Alternatives proposes freedom from identity, instead of communitarianism and tradition, as a condition for liberty and justice.

Free and Open Source Software (FOSS) and other Alternative License Models Jan 27 2022 This book discusses the main legal questions raised by free and open source software (FOSS) licenses and other alternative license models, such as Creative Commons. The legal questions raised by FOSS and other alternative licenses have been the subject of an intense international debate among legal scholars and practising lawyers in the last years. Courts in different jurisdictions have confirmed that the core features of FOSS licenses are compliant with the respective applicable laws and thus enforceable in the respective jurisdictions. What is still missing so far is an in-depth comparative analysis of the legal issues raised by FOSS, Creative Commons and other alternative license on a worldwide scale. This book presents a general report on FOSS licenses and alternative license models to establish common ground and enable comparison between jurisdictions. The general report is followed by 24 national reports covering the world's most important IT-markets. General and national reports use the same structure to facilitate the comparison. The book shows that despite the differences in their origins, all FOSS projects use detailed licenses for the organisation of their communities. It also shows the differences in the proofing of these licenses by courts in some jurisdictions and the tailor-made provisions established by some legislators to solve the legal issues raised by the license model.

Urban Transportation Alternatives Feb 13 2021 The findings are presented of two successful conferences which formed the foundation of a unique process of federal rule-making, and the underlying process that culminated in the conferences is discussed. The availability of new funds for urban mass transportation in 1974 raised complex questions of equitable resource allocation. Reaching answers to these questions involved the developing of consensus on a series of compromise solutions that would best reconcile the competing demands of different claimants. The first conference in February 1975 reached agreement on five principles which dealt with regional multimodal strategy, incremental planning, managing of the existing system, framework for evaluation, and public involvement. Cost effectiveness and usable segments were other areas of Administration's (UMTA) description of the implementation of 1976 was to review the Urban Mass Transportation Administrations (UMTA) description of the implementation of the proposed policy as well as to review on the revised policy on Urban Mass Transportation Investment. A number of related issues were discussed at both conferences. Documents prepared by UMTA as background to the conferences are discussed.

The Alternative: Most of What You Believe About Poverty Is Wrong Mar 29 2022 Clara Miller, President of the F. B. Heron Foundation: The Alternative, is not only important reading, it's imperative. Miller, a trained engineer, the one-time manager of a top social service organization and most

importantly, the son of a remarkable single mother, has both lived and observed the failings embodied in our attitudes toward the poor and, as a result, the flaws in our systems meant to help people in poverty. He merges heart and soul with system thinking to yield a prescription featuring the real math, trust relationships and courage that can change the "us and them," to "upward together" and put American families in the driver's seat to build their futures.

Oct 04 2022 Understand Regulation A+ and other alternative funding methods Regulation A+ and Other Alternatives to a Traditional IPO delves into the details of the new SEC rules under the JOBS Act of 2012 to examine the benefits and pitfalls for entrepreneurs and investors. Written by the 'Godfather of Reg A+,' this book breaks down the complex details of Regulation A+ and other alternative funding methods to help small businesses determine how best to go public and raise capital. A traditional IPO comes with barriers that can be insurmountable for a small company seeking to enter the public markets; thus far, reverse mergers have provided a challenging 'back door' to the market, but Regulation A+ re-opens the front door to allow small cap companies to raise capital while keeping offering and compliance costs manageable in a way not possible with a traditional IPO. More complex than simple crowdfunding, yet just as accessible by all investors, Regulation A+ is a step up for entrepreneurs at any stage wanting to go public where Wall Street meets Main Street. Straightforward explanations, smart strategy, and illustrative examples make this book an invaluable guide for those seeking to truly understand the nuances of Regulation A+ in order to work more effectively within its bounds. Understand how Regulation A+ differs from a traditional IPO and the early experience with this exciting new approach Examine the JOBS Act and the SEC's rules under Title IV Explore the past, present, and future of reverse mergers, special purpose acquisition companies (SPACs) and self-filings Discover new alternatives including new rules under Rule 504 and Regulation S The new rules provide a faster, more streamlined, more cost-effective

Public/Private Partnerships Feb 02 2020 Research and development (R and D) leads to innovation, and innovation leads to technological change. Technological change, in turn, is the primary driver of economic growth.

Public/private partnerships -- cooperative relationships among industry, government, and/or universities -- leverage the efficiency of R and D and are thus a critical aspect of a nation's innovation system. This text is intended for upper-level undergraduate and MBA courses such as Economics and Technology, Economics of Innovation, and Economics of Science and Technology, among others. The first chapter introduces the concept of public/private research partnerships along with other concepts fundamental to an understanding of innovation and technology policy. The framework chapters (2-5) set forth an argument for the public's role - government's role - in innovation in general and in public/private partnership in particular. The remaining chapters (6-14) describe a number of public/private partnerships and, to the extent possible, evaluate their social impact.

Alternatives to Hierarchies Jul 09 2020 Giving on occasions a talk on the subject of this book, one of the queries raised was, 'surely, what you mean are flat hierarchies'. This, I think, gives an indication of how difficult it can be to conceive of organizations which do not have a hierarchical structure. A rather similar response was obtained when, in the 1950's, an account was given to a manager of the British Coal Board of an autonomous composite team of more than 40 miners, who had taken over complete responsibility for a three-shift cycle, and divided the income obtained among themselves. His comment was that this could not possibly work. The new mode of work organization which had been evolved by the miners in several pits in the Durham coal fields was, at the time, well ahead of the prevailing concepts and philosophy of both management and the Trade Union. It did not help matters very much that the detailed accounts were presented in an academic and

scientific form (Trist et al. , 1963; Herbst, 1962). I think that we felt that all the backing of systematic research and data analysis would be needed to present the case for modes of organization, which deviated from conventional practice. However, something was learned from this experience. When at the beginning of the 1960's the Norwegian Work Democratization Project was started, a number of demonstration sites were set up which people could look at, and which could function as centers for diffusion.

The Alternatives to War Aug 22 2021 If states are not to go to war, what should they do instead? In *The Alternatives to War*, James Pattison considers the case for the alternatives to military action to address mass atrocities and aggression. The volume examines the normative issues raised by measures ranging from comprehensive economic sanctions, diplomacy, and positive incentives, to criminal prosecutions, nonviolent resistance, accepting refugees, and arming rebels. For instance, given the indiscriminateness of many sanctions regimes, are sanctions any better than war? Should states avoid 'megaphone diplomacy' and adopt more subtle measures? What, if anything, can nonviolent methods such as civilian defence and civilian peacekeeping do in the face of a ruthless opponent? Is it a serious concern that positive incentives can appear to reward aggressors? Overall, Pattison provides a comprehensive account of the ethics of the alternatives to war. In doing so, he argues that the case for war is weaker and the case for many of the alternatives is stronger than commonly thought. The upshot is that, when reacting to mass atrocities and aggression, states are generally required to pursue the alternatives to war rather than military action. The volume concludes that this has significant implications for pacifism, just war theory, and the responsibility to protect doctrine.

The New Systems Reader Mar 05 2020 The recognition is growing: truly addressing the problems of the 21st century requires going beyond small tweaks and modest reforms to

business as usual--it requires "changing the system." But what does this mean? And what would it entail? The New Systems Reader highlights some of the most thoughtful, substantive, and promising answers to these questions, drawing on the work and ideas of some of the world's key thinkers and activists on systemic change. Amid the failure of traditional politics and policies to address our fundamental challenges, an increasing number of thoughtful proposals and real-world models suggest new possibilities, this book convenes an essential conversation about the future we want.

Hello Cruel World _____ Oct 24 2021 Celebrated transsexual trailblazer Kate Bornstein has, with more humor and spunk than any other, ushered us into a world of limitless

possibility through a daring re-envisionment of the gender system as we know it. Here, Bornstein bravely and wittily shares personal and unorthodox methods of survival in an often cruel world. A one-of-a-kind guide to staying alive outside the box, *Hello, Cruel World* is a much-needed unconventional approach to life for those who want to stay on the edge, but alive. *Hello, Cruel World* features a catalog of 101 alternatives to suicide that range from the playful (moisturize!), to the irreverent (shatter some family values), to the highly controversial. Designed to encourage readers to give themselves permission to unleash their hearts' harmless desires, the book has only one directive: "Don't be mean." It is this guiding principle that brings its reader on a self-validating journey, which forges wholly new paths toward a resounding decision to choose life. Tenderly intimate and unapologetically edgy, Kate Bornstein is the radical role model, the affectionate best friend, and the guiding mentor all in one.

Green Growth Jan 15 2021 The discourse of 'green growth' has recently gained ground in environmental governance deliberations and policy proposals. It is presented as a fresh and innovative agenda centred on the deployment of engineering sophistication, managerial acumen and market mechanisms to redress the environmental and social derelictions of the existing development model. But the green growth project is deeply inadequate, whether assessed against criteria of social justice or the achievement of sustainable economic life upon a materially finite planet. This volume outlines three main lines of critique. First, it traces the development of the green growth discourse quaideology. It asks: what explains modern society's investment in it, why has it emerged as a master concept in the contemporary conjuncture, and what social forces does it serve? Second, it unpicks and explains the contradictions within a series of prominent green growth projects. Finally, it weighs up the merits and demerits of alternative

strategies and policies, asking the vital question: 'if not green growth, then what?'

The Alternative Aug 29 2019 "The Alternative is about thinking differently. Doing differently. Creating your own path. Taking paths of great resistance. And actually making a difference in the lives around us ... and in the world at large." —Caleb Stanley and Austin Dennis *The Alternative: Awaken Your Dreams, Unite Your Community and Live in Hope* focuses on the big issues in life: friendship, dating, anxiety, self-esteem, faith, and the future—to name a few. Caleb Stanley and Austin Dennis, cofounders of The Alternative nonprofit, bring together inspirational voices such as Jefferson Bethke, Luke Lezon, Chelsea Crockett, and more to tackle tough issues with honesty and humor. Based on the core principles of The Alternative movement, Caleb and Austin inspire readers to awaken their dreams, to unite communities in today's tumultuous world, and to amplify hope in themselves and the people around them. In addition to advice and real-world anecdotes, this book is packed with mini-essays, Q&As, and devotions from today's best-known faith leaders. This full-color ebook is perfect for fans of *Do Hard Things* and *The 7 Habits of Highly Effective Teens*.
