The Official MacGyver Survival Manual Sep 19 2021 Handy (and often hilarious) hacks from the resourceful TV hero. Includes illustrations! For over thirty years, the name MacGyver has been synonymous with astonishing feats of ingenuity, from fixing a car with nothing but water and egg whites to busting out of jail using a hairpin and a pair of repurposed handcuffs to, of course, saving the world with his favorite weapon, a simple paperclip. What you might not know is that every trick that the resourceful secret agent pulls off on CBS's hit show has been tested and fact-checked by experts, and really works . . . most of the time. No one is saying that you should craft a DIY airplane out of trash bags and a lawnmower engine. But with this book, you could. The first official how-to guide to the MacGyver universe, this book is packed with drawings and step-by-step descriptions of the hacks that made this character the world's most resourceful secret agent. It's lots of fun for fans of the new hit series as well as the classic show that started it all—or anyone who enjoys a bit of applied physics and clever problem-solving.

A Pocket Manual to Save the Planet Jul 18 2021 A POCKET MANUAL TO SAVE THE PLANET offers a series of specific and practical proposals for dealing with the three most important issues that threaten to destroy our national and inter-national societies to one extent or another: GLOBAL DEPRESSION: This possibility will be triggered if and when our government defaults on its mountain of debts and essentially declares bankruptcy, which will be followed by a global depression. This is predicted by many of our best economists to happen sometime between roughly 2014 and 2016. GLOBAL WARMING: This peril is presently melting our ice caps and mountain glaciers, slowly raising the level of our oceans until they potentially flood the low-lying areas of our global civilization; that is where about 50% of our global population lives within about 50 miles of our coast lines. This is variously predicted by our best environmental scientists to happen by about the end of the 21st century with about 3-6 feet of water, so it requires action now to prevent it because it is already set in place to happen; and many scientists say we have already passed the point where we can prevent it from happening. GLOBAL ARMAMENTS: We now spend, as a planet, approximately \$1.75 trillion a year on armaments and wars of one kind or another. If we continue to spend our scarce resources on killing each other rather than preventing global depressions and defeating global warming, we will be hopelessly unable to create peace on our planet, and therefore we may allow the destruction of our global civilization at the hands of global warming. This inability to live in peace rather than war already resulted in our killing 300 million human beings during the 20th century. That figure is about equal to the total population of the United States. GLOBAL PEACE. So we are a doomed global civilization if we do not prevent a global depression, defeat global warming, and achieve global disarmament. We can ignore all of the warning signs of our coming devastation, but it is our futures that we are gambling away by our lethargy, as well as the futures of our children and grandchildren. This is because, in order to prevent the invasion of these ocean waters, we need to become a completely coordinated global unit, that acts according to a single, global, heartbeat. This is a level of global co-operation that we will never be able to achieve in the middle of the social chaos of a global depression or continuous military conflicts, so we could never defeat global warming before it invades our coastal civilizations with 3-6 feet of water. Therefore: If we don't create a stable, global economy; if we don't achieve global disarmament; then we won't be able to defeat global warming and prevent the invasion of our coastal areas with 3-6 feet of water; so we can kiss our global civilization good-bye. But if we start soon enough; if we lay down our arms together; if we work together with each other all over the world to prevent a global depression and to defeat global warming; then we will be able to live in global peace. "They shall beat their swords into plowshares, and their spears into pruning hooks. Nation shall not lift up sword against nation, neither shall they learn war anymore." (Isaiah 2:4) We can finally fulfill Isaiah's prophesy if we will take it to heart and live in peace rather than in war. These goals are within our grasp, if we will take these necessary steps.

Frontlines of Freedom Oct 21 2021 America is the greatest country the world has ever known... but there is a shadow looming on the horizon. Are America's best days behind her? Can her many problems be fixed? Can America be restored to its former greatness? Millions of patriotic Americans love their country, and want its greatness to continue, but they look around them and see a nation at war with itself. Left verses right. Liberal vs conservative. And there seems to be no end in sight. Never before in its history has America ever been so culturally polarized. From the makers of the Frontlines of Freedom radio show, the nation's largest military veteran talk show, America's military vets bring you their ideas on America's ills and how to cure them. This book *Frontlines of Freedom: Field Manual* by Vets for Patriots is your primer on American freedom and how to save America. If you care about America, you must read this book!

The Manual of Seed Saving Nov 02 2022 "Makes it easy to find information in a snap, on most any edible you want to grow." —Kylee Baumle, Horticulture Growing vegetables, fruits, and herbs from seed has many benefits for both the gardener and the planet. Why save seeds when you can buy them so cheap? Not only does seed saving allow you to grow a diverse, organic array of fruits and vegetables, it also offers an opportunity to work closely with nature and be even more hands-on with the food you grow, cook, and eat. Supported by research from the global conservation organizations Arche Noah and Pro Specie Rara, *The Manual of Seed Saving* features information on how to maximize seed quality and yield for crop plants like asparagus, carrots, corn, rhubarb, spinach, squash, and tomatoes. Plant profiles include critical information on pollination, isolation distances, cultivation, harvest, storage, and pests and diseases.

How to Save the World Dec 03 2022 You want to change the world. You want your work to have meaning. Maybe you're even audacious enough to want saving the world to be fun. What if saving the Earth were a game? Not just any game, but the greatest game we've ever played. This workbook helps social and environmental change professionals learn how to implement powerful techniques from the fields of game design, behavioral psychology, design, data science, and storytelling, that are not only proven to have impact, but also can make your project fun. In a 10-step framework of exercises, tutorials, and case studies, *How to Save the World* will teach you the art of changing the world - and it's often not what you think. Did you know that just by putting a sign above a recycling bin that showed people the number of cans inside increased the recycling rate by 67 percent? Or when people standing in line at a cafe were told that other customers before them had ordered a vegetarian meal, that this simple intervention doubled the total rate of vegetarian meal orders? As you implement these academically researched and measurement-driven techniques, *How to Save the World* will drive you to dig into your creativity and unearth your greatest ideas that shift the numbers on the causes you most care about, so you can experience the joy and satisfaction of seeing your work really, actually change the world every single day.
