Inheriting Poverty? Oct 08 2020 South African legislation, as well as international conventions like the UN Convention on the Rights of the Child and the African Charter on the Rights and Welfare of the Child which have been ratified by South Africa, indicate shared and increasing acknowledgement of the importance of protecting and promoting children's rights. In South Africa these remain confined to principle and policy. In practice, poverty, unemployment, child labour, violence and abuse, inadequate policy support and serviced, ignorance and above all HIV/AIDS pose a real threat to the realisation and enjoyment of these rights. This study on the interface between unempolymnet, poverty and children's wellbeing in South Africa arose out of seminar, hosted by the Children's Budget Unit of the

Institute for Democracy in South Africa, the Children's Institute of the University of Cape Town and Save the Children Sweden, to identify research gaps in the connection between child wellbeing and poverty.

The Oxford Handbook of Megaproject Management Jan 29 2020 The Oxford Handbook of Megaproject Management provides state-of-the-art scholarship in the emerging field of megaproject management. Megaprojects are large, complex projects which typically cost billions of dollars and impact millions of people, like building a high-speed rail line, a megadam, a national health or pensions IT system, a new wide-body aircraft, or staging the Olympics. The book contains 25 chapters written especially for this volume, covering all aspects of megaproject management, from front-end planning to actual project delivery, including how to deal with stakeholders, risk, finance, complexity, innovation, governance, ethics, project breakdowns, and scale itself. Individual chapters cover the history of the field and relevant theory, from behavioral economics to lock-in and escalation to systems integration and theories of agency and power. All geographies are covered - from the US to China, Europe to Africa, South America to Australia - as are a wide range of project types, from "hard" infrastructure to "soft" change projects. In-depth case studies illustrate salient points. The Handbook offers a rigorous, research-oriented, up-to-date academic view of the discipline, based on high-quality data and strong theory. It will be an indispensable resource for students, academics, policy makers, and practitioners.

Debates of the Legislature of the Free State Province (Hansard) Nov 08 2020

Strategies for Survival at SIBIKWA 1988 – 2021 Jun 03 2020 This book provides an engaging and contextualised insight into a South African township-based arts centre that has survived the vicissitudes of steady militarisation in townships during some of the worst years of apartheid as well as the exhilaration of a new democratic policy while attempting to circumnavigate different policies and funding dispensations. Sibikwa provides arts centres across the world and especially those in decolonising countries with strategies for survival in tumultuous times. This multi-disciplinary book maps and co-ordinates wider historical, political, and social contextual concerns and events with matters specific to a community-based east of Johannesburg and provides an exploration and analysis by experts of authentic theatre-making and performance, dance, indigenous music, arts in

education and NGO governance. It has contemporary significance and raises important questions regarding inclusivity and transformation, the function and future of arts centres, community-based applied arts practices, creativity, and international partnerships. This study will be of great interest to students and scholars in theatre and performance, indigenous music, dance, and South African history.

Local Government, Gender and Integrated Development Planning Jan 11 2021 Examining the South African National Gender Policy guidelines, this thorough analysis explores the extent to which integrated development plans of local municipalities uphold women's rights as stated in the South African constitution. Based on a project carried out in KwaZulu-Natal from 2004 to 2006, this in-depth research considers the difficulties posed to South African women who wish to meaningfully participate in local government because of entrenched patriarchy in their communities. This exhaustive study also stimulates discussion on how to advance gender equality in developing countries within the context of decentralization.

Development Planning in South Africa Apr 25 2022 Celebrated as a beacon of democracy and reconciliation, many people in South Africa continue to live in severe poverty, particularly in the Eastern Cape Province. Backed by the United Nations Development Programme, the Eastern Cape's provincial government consequently launched an historically ambitious programme – the Provincial Growth and Development Plan – aimed at tackling the province's poverty, unemployment and inequality over a ten-year period in a radical policy overhaul. Drawing on the author's first-hand engagement with the planning process, *Development Planning in South Africa* is an empirically rich study that utilises a strategic-relational approach to explore the ways in which this unprecedented challenge was negotiated and eventually undermined by the South African state. The first work of its kind, the book provides an indispensable micro-level study with profound implications for how state power is understood to be organised and expressed in state policy. Relevant beyond South Africa to policy implementation in both developing and developed states globally, the book is essential reading for students and scholars of government studies, political economy, development, policy studies and social movements.

Technical College Responsiveness Sep 06 2020 This text analyses how technical colleges have responded to the emerging field of further education and training (FET) in South Africa. The data and theories presented are the result of research conducted by the Human Sciences Research Council, including surveys of technical college graduates and employers on their satisfaction with college graduates and institutional profiles of local labor markets. The international case studies of vocational and technical education demonstrate the interrelatedness of education and training systems.

Structural Approaches in Public Health Apr 13 2021 A CHOICE Outstanding Academic Title 2014! That health has many social determinants is well established and a myriad range of structural factors – social, cultural, political, economic, and environmental – are now known to impact on population well-being. Public health practice has started exploring and responding to a range of health-related challenges from a structural paradigm, including individual and population vulnerability to infection with HIV and AIDS, injury-prevention, obesity, and smoking cessation. Recognising the inadequacy of public health responses that focus solely on individual behaviour change to improve population health outcomes, this text promotes a more holistic approach. Discussing the structural factors related to health and well-being that are both within and outside of an individual's control, it explores what form structural approaches can take, the underlying theory of structure as a risk factor and the local realities, environments, and priorities that public health practitioners need to take into consideration. Anchored in empirical evidence, the book provides case studies of innovative and influential interventions – from the 100% condom program, to urban planning, injury prevention, and the provision of adequate clean drinking water and sanitation systems – and concludes with a section on implementing and evaluating structural public health programs. This comprehensive text brings together a selection of internationally-recognised authors to provide an overview for students and practitioners working in or concerned with public health around the globe.

South African Labour Bulletin Jun 15 2021

Tell Our Story Sep 18 2021 Focusing on three South African communities the authors dismiss the idea that some groups are voiceless, arguing that they are being deliberately ignored by dominant news media The dominant news media are often accused of reflecting an 'elite bias', privileging and foregrounding the interests of a small segment of society while ignoring the narratives of the majority. The authors of Tell Our Story investigate this problem and offer a hands-on demonstration of listening journalism and research in practice. In the process they dismiss the idea that some groups are voiceless, arguing that what is often described in such terms is mostly a matter of those groups being deliberately ignored. Focusing their attention on three very different South African communities they delve into the life and struggle narratives of each, exposing the divide between the stories told by the people who actually live in the communities and the way in which those stories have been understood and shaped by the media. The three communities are those living in the Glebelands hostel complex in Durban where over 100 residents have been killed in politically motivated violence in the past few years; the Xolobeni community on the Wild Coast, which has been resisting the building of a new toll road and a dune mining venture; and Thembelihle, a settlement south-west of Johannesburg that has been resisting removal for many years. The book concludes with a set of practical guidelines for journalists on the practice of listening journalism.

Current Issues of Water Management Jul 29 2022 There is an estimated 1.4 billion km³ of water in the world but only approximately three percent (39 million km³) of it is available as fresh water. Moreover, most of this fresh water is found as ice in the arctic regions, deep groundwater or atmospheric water. Since water is the source of life and essential for all life on the planet, the use of this resource is a highly important issue. "Water management" is the general term used to describe all the activities that manage the optimum use of the world's water resources. However, only a few percent of the fresh water available can be subjected to water management. It is still an enormous amount, but what's unique about water is that unlike other resources, it is irreplaceable. This book provides a general overview of various topics within water management from all over the world. The topics range from politics, current models for water resource management of rivers and reservoirs to issues related to agriculture. Water quality problems, the development of water demand and water pricing are also addressed. The collection of contributions from outstanding scientists and experts provides detailed information about different topics and gives a general overview of the current issues in water management. The book covers a wide range of current issues, reflecting on current problems and demonstrating the complexity of water management.

The National Skills Development Handbook 2007/8 Jan 03 2023

OECD Economic Surveys: South Africa 2017 Sep 26 2019 Over the last two decades, South Africa has accomplished enormous social progress by bringing to millions of citizens access to key public services. Nevertheless, growth has trended down markedly recently due to constraints on the supply side. Low growth has led to the stagnation of GDP per ...

policies and prospects. Special chapters cover infrastructure and business regulation; tax policy and inclusive growth.

The A to Z of Careers in South Africa Jul 17 2021

Water Governance for Sustainable Development Jun 27 2022 Good management of water resources - universally identified as a key aspect of poverty reduction, agriculture and food security - has proven, in practice, as difficult to achieve as it is eagerly sought. This book, edited and authored by leading authorities on water resource management, examines the recent changes in governance, institutions, economics and policies of water, covering developing, transitional and developed countries, with special emphasis on southern African case studies. The book examines how water policies, institutions and governance have shifted in recent years from supply-driven, quantitative, centrally controlled management to more demand-sensitive, decentralized, participatory approaches. Such a move often also implies cost recovery principles, resource allocation among competing sectors, and privatization. The case studies demonstrate that the new policies and legal frameworks have been difficult to implement and often fall short of initial expectations. Using an accessible multidisciplinary approach that integrates economics, sociology, geography and policy analysis, the book untangles the issues and presents best practices for policy- and decision-makers, governments and regulators, NGOs and user groups, service providers, and researchers. The overall aim is to show how good water governance structures can be developed and implemented for the benefit of all.

FET Colleges Nov 01 2022

Tourism in Frontier Areas Mar 13 2021 In this timely new collection of essays, an excellent roster of contributors bring new insight to a wide spectrum of topics related to tourism in frontier areas. The book focuses on international case studies as it discusses the economic feasibility of frontier tourist development, the tourist development of rural and urban settings, and the expansion of tourism to remote borderlands. The contributors highlight the potential, as well as the environmental, economic, bureaucratic, and cultural difficulties of peripheral tourism. This innovative and thought-provoking approach--with its wealth of detail--makes *Tourism in Frontier Areas* essential reading for scholars in tourist development, regional development, and economic geography.

OECD Economic Surveys: South Africa 2020 May 03 2020 The COVID-19

outbreak is worsening an already fragile economic outlook. Since 2013, growth has been modest and unemployment has been rising. Policy uncertainty has been the main driver of low confidence and subdued investment. Following a sharp fiscal deterioration in recent years, the crisis also heightened debt sustainability challenges.

[There is Water](#) May 27 2022 This unique trilingual publication offers a traveller's view of the people of the Xhariep and their daily lives. The book results from a research project in the southern Free State, 'Multilingualism for Empowerment', that was undertaken with the financial assistance of the Province of Antwerp in Flanders, Belgium, and in collaboration with the University of Antwerp. The book entails a collection of journal entries, photographs, interview material and background information recorded by Lut Teck, a Flemish member of the research team, during her field work in the area.

Gaffney's Local Government in South Africa Aug 30 2022

Debating High Skills and Joined-up Policy Nov 20 2021 Debates about good governance are increasingly focused on the coordination failure that occurs when several agencies are required to act in concert with each other, and this monograph looks at just such a case in the South African government's efforts to "join up" education and work to produce a skilled labor force.
