School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child’s social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal This book is the hitherto unpublished memoir of Abram I. Elkus (1867-1947), a successful new York lawyer and judge. He was a committed democrat and worked to pass legislation for the betterment of living and working conditions for ordinary people in New York City. He also played an important role in the successfulelection campaign of president Woodrow Wilson in 1912. Elkus became the last US ambassador to Ottoman Turkey in 1916-1917. Today he is best remembered for his role in saving thousands of Armenian lives, as he continued the work of his predecessor in Constantinople, Ambassador Morgenthau. After WWI he was appointed a member of the league of Nations Commission to resolve the Aaland Islands dispute between Sweden and Finland. Elkus' public life was cut short because of illness. The memoirs of Abram Elkus provide fascinating insights into American social and political life around the turn of the 20th century. Palemia tells the story of how a boy from an isolated village grew up to become Prime Minister of Samoa. It follows his journey from Lepa to Apia, Wellington, Brussels, Singapore, Beijing, Tokyo, London, New York and many other international destinations, always returning to Lepa and the Fa'asamoa that shaped him. Tuila'epa Sa'ilele Malielegaoi is Samoa's longest-serving Prime Minister. His premiership has been marked by political and economic crises, natural disasters, regional tensions and local challenges. Tuila'epa's political career started during turbulent times but has resulted in an unprecedented period of political stability and economic development through his leadership in modernising the economy, improving education and health and reducing poverty in Samoa. Palemia captures the voice, documents the life, and places in context a record of the most significant Samoan political leader of this generation, and contains many useful insights into the social, cultural and economic development of Samoa and the wider Pacific region. 'In collaboration with Peter Swain, a superb conveyer of information, Tuila'epa narrates his entry into politics and his rise to power. The book is a fascinating biography and provides a stimulating, thoughtful, original and authoritative perspective on Samoan political life - from the inside.' --Professor Stephen Levine. "There are not many books on ethics that are currently available, especially in Indonesia. This book comes to fill that gap. A commendable book that researchers should read, especially when there is more and more research on human behavior. It is a stupendous work." ? M. Chatib Basri, Executive Director, IBER Minister of Finance of the Republic of Indonesia 2013-2014 “This book addresses an important set of issues in the context of Indonesia, a large developing country in Southeast Asia. Most work on research ethics has originated in the developed world; the strength of this book is that it relates the large international literature to the specific problems which Indonesian researchers are likely to face, especially in the social sciences. It deserves a wide readership both in Indonesia and in other parts of the world.” ? Anne Booth, Professor Emeritus, SOAS, University of London "In a world full of fake news, corrupt bureaucracies, and inequitable judgements it is vital that the training of rising generations of social scientists contains thorough grounding in ethics. This volume should be required reading in all teaching programs, and a valuable addition on the desk of all graduates wishing to pursue a career in the social research professions.” ? Terence H. Hull, Emeritus Professor of Demography, The Australian National University “Reading this book is an eye-opening experience. Mayling Oey Gardiner presents novelty by discussing ethics in social science research on current issues such as big data, internet-based research, and environmental research. This book can guide academics and decision-makers to define boundaries and consider the impact of social research.” ? This is something for kids to think about, like being able to get up on their own and eating a good breakfast before school. Is Christianity the natural enemy of identitarianism? Has it contributed to the liberalization of our societies and to the mass immigration which is so quickly altering our social make-up and changing the face of our nations? What can Christianity, past or present, offer us at this unprecedented historical moment of political and social change? Catholic and Identitarian seeks to answer these questions from a traditionalist Catholic perspective. Arguing that Christianity, and Catholicism in particular, far from being an enemy to identitarianism, actually forms the necessary underpinning for true European identitarianism, this book demonstrates that the teachings and traditions of the Church have always respected ethnic and national borders and protected the integrity of authentic human roots. At once a vindication of the Church against the misinterpretations and misrepresentations of left and right alike, and a stirring call to defend our European heritage from the forces that would destroy it, Catholic and Identitarian reminds us of the basic truth that "to fight is to love." A keen critic of culture in modern Indonesia, Andrew N. Weintraub shows how a genre of Indonesian music called dangdut evolved from a debased form of urban popular music to a prominent role in Indonesian cultural politics and the commercial music industry. Dangdut Stories is a social and musical history of dangdut within a range of broader narratives about class, gender, ethnicity, and nation in post-independence Indonesia (1945-present). Acclaimed journalist Ted Conover sets a new standard for bold, in-depth reporting in this first-hand account of life inside the penal system at Sing Sing. When Ted Conover’s request to shadow a recruit at the New York State Corrections Officer Academy was denied, he decided to apply for a job as a prison officer himself. The result is an unprecedented work of eyewitness journalism: the account of Conover's year-long passage into storied Sing Sing prison as a rookie guard, or "newjack." As he struggles to become a good officer, Conover angers inmates, dodges blows, and attempts, in the face of overwhelming odds, to balance decency with toughness. Through his insights into the harsh culture of prison, the grueling and demeaning working conditions of the officers, and the unexpected ways the job encroaches on his own family life, we begin to see how our burgeoning prison system brutalizes everyone connected with it. An intimate portrait of a world few readers have ever experienced, Newjack is a haunting journey into a dark undercurrent of American life. Neuropsychotherapy is intended to inspire further development and continual empirical updating of consistency theory. It is essential for psychotherapists, psychotherapy researchers, clinical psychologists, psychiatrists, neuroscientists, and mental-health professionals. Profoundly important and innovative, this volume provides necessary know-how for professionals as it connects the findings of modern neuroscience to the insights of psychotherapy. Throughout the book, a new picture unfolds of the empirical grounds of effective psychotherapeutic work. Author Klaus Grawe articulates a comprehensive model of psychological functioning-consistency theory-and bridges the gap between the neurosciences and the understanding of psychological disorders and their treatment. Neuropsychotherapy illustrates that psychotherapy can be even more effective when it is grounded in a neuroscientific approach. Cutting across disciplines that are characteristically disparate, the book identifies the neural foundations of various disorders, suggests specific psychotherapeutic conclusions, and makes neuroscientific knowledge more accessible to psychotherapists. The book's discussion of consistency theory reveals the model is firmly connected to other psychological theoretical approaches, from control theory to cognitive-behavioral models to basic need theories. I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day. A wild child finds settling down is suicide. An old man follows the girl of his dreams. Two mates waste a decade one-upping each other. A bogan bothers his way into the history books. Damaged daddies, angry young men, struggling saints, a has-been with a harem, a regretful gangsta... and a godfather grandmother. Here's the fourth folio of striking stories by NZ writer Michael Botur. In a book sure to inspire controversy, Gene Heyman argues that conventional wisdom about addiction - that it is a disease, a compulsion beyond conscious control - is wrong. At the heart of Heyman's analysis is a startling view of choice and motivation that applies to all choices, not just the choice to use drugs. Heyman’s analysis of well-established but frequently ignored research leads to unexpected insights into how we make choices - from obesity to McMansionization - all rooted in our deep-seated tendency to consume too much of whatever we like best. But wait till you see how the battle ends...! “The definitive work on the gifted, haunted actor” (Los Angeles Times) and “the best film star biography in years” (Newsweek). From the moment he leapt to stardom with the films Red River and A Place in the Sun, Montgomery Clift was acclaimed by critics and loved by fans. Elegant, moody, and strikingly handsome, he became one of the most definitive actors of the 1950s, the first of Hollywood’s “loner heroes,” a group that includes Marlon Brando and James Dean. In this affecting biography, Patricia Bosworth explores the complex inner life and desires of the renowned actor. She traces a poignant trajectory: Clift’s childhood was dominated by a controlling, class-obsessed mother who never left him alone. He developed passionate friendships with Marilyn Monroe and Elizabeth Taylor in spite of his closeted homosexuality. Then his face was destroyed after a traumatic car crash outside Taylor’s house. He continued to make films, but the loss of his beauty and subsequent addictions finally brought the curtain down on his career. Stunning and heartrending, Montgomery Clift is a remarkable tribute to one of Hollywood’s most gifted—and tormented—actors. New York Times bestselling author Ron Powers offers a searching, richly researched narrative of the social history of mental illness in America paired with the deeply personal story of his two sons' battles with schizophrenia. From the centuries of torture of "lunatics" at Bedlam Asylum to the infamous eugenics era to the follies of the anti-psychiatry movement to the current landscape in which too many families struggle alone to manage afflicted love ones, Powers limns our fears and myths about mental illness and the fractured public policies that have resulted. Braided with that history is the moving story of Powers's beloved son Kevin -- spirited, endearing, and gifted -- who triumphed even while suffering from schizophrenia until finally he did not, and the story of his courageous surviving son Dean, who is also schizophrenic. A blend of history, biography, memoir, and current affairs ending with a consideration of where we might go from here, this is a thought-provoking look at a dreaded illness that has long been misunderstood. "Extraordinary and courageous . . . No doubt if everyone were to read this book, the world would change." -- New York Times Book Review The Spice Islands Voyage is about a journey and a quest: a journey among the Spice Islands of equatorial Indonesia aboard a traditional native sailing vessel; a quest to rediscover Alfred Russel Wallace, the brilliant and intrepid naturalist who jointly proposed, with Charles Darwin, the theory of natural selection, and whose travels founded the science of zoo geography. Navigating through sparkling coral seas to remote shorelines, Tim Severin and his crew retraced the explorer's journeys, encountering green turtles and flying foxes, observing the smuggling of rare birds and rainforest destruction, but also witnessing the emergence of a new sense

of environmental awareness. 'Full of insights retraces a journey through places of fabulous natural and cultural diversity should inspire new readers to discover the remarkable writings of Wallace himself', Independent Courage is a brave boy who has to defeat the cancer dragon who is trying to give Leukemia to children. The story of Twelve Apostles is the story of early Christianity: its competing versions of Jesus's ministry, its countless schisms, and its ultimate evolution from an obscure Jewish sect to the global faith we know today in all its forms and permutations. In his quest to understand the underpinnings of the world's largest religion, Tom Bissell embarks on a years-long pilgrimage to the apostles' supposed tombs, traveling from Jerusalem and Rome to Turkey, Greece, Spain, France, India, and Kyrgyzstan. Along the way, Bissell uncovers the mysterious and often paradoxical lives of these twelve men and how their identities have taken shape over the course of two millennia. Written with empathy and a rare acumen—and often extremely funny—Apostle is an intellectual, spiritual, and personal adventure fit for believers, scholars, and wanderers alike. The Jataka as we possess tells about the life of Buddha during some incarnation in one of his previous existences as a Bodhisatta (one being destined to enlightenment).
