Advances in Physical Ergonomics and Human Factors: Part II Dec 14 2020 The discipline of human factors and ergonomics (HF/E) is concerned with the design of products, process, services, and work systems to assure their productive, safe and satisfying use by people. Physical ergonomics involves the design of working environments to fit human physical abilities. By understanding the constraints and capabilities of the human body and mind, we can design products, services and environments that are effective, reliable, safe and comfortable for everyday use. This book focuses on the advances in the physical HF/E, which are a critical aspect in the design of any human-centered technological system. The ideas and practical solutions described in the book are the outcome of dedicated research by academics and practitioners aiming to advance theory and practice in this dynamic and all-encompassing discipline. A thorough understanding of the physical characteristics of a wide range of people is essential in the development of consumer products and systems. Human performance data serve as valuable information to designers and help ensure that the final products will fit the targeted population of end users. Mastering physical ergonomics and safety engineering concepts is fundamental to the creation of products and systems that people are able to use, avoidance

of stresses, and minimization of the risk for accidents.

The Political Economy of Work in the Global South Aug 22 2021 Part of the Critical Perspectives on Work and Employment series, this edited collection brings together contributions from leading international scholars to initiate an important dialogue between labour process analysis and scholarship on work in the Global South. This book characterises the forms of work and labour process that characterise globalising capitalism today and addresses core analytical concerns within Labour Process Theory and research on work in the South. It explores how a wide range of production relations in the Global South, ranging from formal to informal employment and self-employment, are embedded in wider social relations of gender, caste, religion and ethnicity, and are related to wider patterns of commodification and resistance. Drawing on cutting-edge research, the book's chapters consider a diverse range of working situations, covering migrant workers in the Middle East, commercial surrogacy work in India and cooperative garment workers in Argentina. In offering a novel reading of the political economy of work in the Global South and shedding light on lesser-considered fields of work and worker organization, this volume will provide new insights for making sense of the changing world of work for students, scholars, labour activists and practitioners alike.

Social Work with the Aged and Their Families Oct 24 2021 *Social Work with the Aged and Their Families* presents the functional-age model (FAM) of intergenerational treatment, an integrative theoretical framework for social workers practicing with older adults and their families. In keeping with the Council on Social Work Education's curriculum mandate of 2015, social workers are now encouraged to use human behavior theories in working with their geriatric clients. This fourth edition incorporates much-needed additional techniques to address the mental health assessments of the elderly. FAM addresses the assessment of older adults' biological, psychological, socio-cultural, and

spiritual age. It also incorporates an evaluation of the family system, family roles, and family development in this assessment. Interventions at the individual, family, group, and community levels are discussed. This volume, augmented with recent concepts related to successful aging, spirituality, and resiliency, presents the major converging conceptual trends that constitute a model for twenty-first century social work practice in the field of aging. It is an indispensable text for those training in social work practice with the elderly, or those currently in practice.

Home Improvement in Aotearoa New Zealand and the UK Oct 04 2022 This book examines experiences of home improvement in the UK and Aotearoa New Zealand, providing valuable insight into the ways in which people make and maintain home in social, material and economic context. Drawing on in-depth interviews, examining both DIY projects and projects carried out by professional handymen, Rosie Cox explores how home improvement fits into wider social relationships and structures of inequality. Consideration is given to the importance of such work for gender and national identities, and how these identities are related to material contexts and the forms and fabric of homes. The book also highlights how home improvement can be a rewarding and valuable form of work, as well as an unrewarding and alienating endeavour. It will be of interest to scholars from a range of disciplines including anthropology, sociology and human geography.

Vapour-Liquid Equilibrium Dec 26 2021 Vapor-Liquid Equilibrium, Second Edition covers the theoretical principles and methods of calculation of equilibrium conditions from various experimental data and the elements of measuring technique, as well as the instruments for the direct determination of the equilibrium compositions of the liquid and vapor phases of the system. The book discusses the relations necessary for the thermodynamic treatment of the equilibrium between the liquid and vapor phase of a system; the concept of an ideal solution and auxiliary thermodynamic functions; and the

activity and the activity coefficient. The text also describes vapor-liquid equilibrium in real systems (electrolytes and non-electrolytes) and in systems whose components (i.e. temperature, pressure, and composition of phases) mutually react according to several stoichiometric equations. The criteria of purity of substances and the methods of measuring temperature; low, medium, and high pressures; the pressures of the saturated vapors at given temperatures; and the boiling points at given pressures used in laboratory work in the field of vapor-liquid equilibrium are considered. The book also tackles the methods for the direct determination of equilibrium data (distillation, circulation, static, dew and bubble point, and flow methods). The text concludes with a review of the literature on the systems whose vapor-liquid equilibrium data had been measured and reported to the beginning of 1954. Workers in the chemical industry who deal with problems of distillation and rectification will find the book useful.

Design Issues in CSCW Jan 03 2020 One of the most significant developments in computing over the last ten years has been the growth of interest in computer based support for people working together. Recognition that much work done in offices is essentially group work has led to the emergence of a distinct subfield of computer science under the title Computer Supported Cooperative Work (CSCW). Since the term was first coined in 1984, there has been growing awareness of the relevance to the field of, and the valuable contributions to be made by, non-computing disciplines such as sociology, management science, social psychology and anthropology. This volume addresses design issues in CSCW, and since this topic crucially involves human as well as technical considerations - brings together researchers from such a broad range of disciplines. Most of the chapters in this volume were originally presented as papers at the one-day seminar, "Design Issues in CSCW", held at the Department of Trade and Industry (DTI), London, on 17 March 1992, one in a series of DTI-supported CSCW SIG seminars. We would like to express our gratitude to the series editors, Colston Sanger and Dan Diaper, for their useful comments on, and suggestions for revisions to, the final draft of the manuscript; to Linda Schofield, our editor at Springer, for her continued encouragement throughout the preparation of the manuscript; and, finally, to our respective families for their support and patience over so many months.

The Palgrave Handbook of Global Social Work Education Feb 02 2020 This handbook addresses the issues and challenges of the delivery of social work education in the contemporary world. Coastal Engineering Nov 05 2022 Effective coastal engineering is expensive, but it is not as costly as neglect or ineffective intervention. Good practice needs to be based on sound principles, but theoretical work and modelling also need to be well grounded in practice, which is continuously evolving. Conceptual and detailed design has been advanced by new industry publications since the publication of the second edition. This third edition provides a number of updates: the sections on wave overtopping have been updated to reflect changes brought in with the recently issued EurOtop II manual; a detailed worked example is given of the calculation of extreme wave conditions for design; additional examples have been included on the reliability of structures and probabilistic design; the method for tidal analysis and calculation of amplitudes and phases of harmonic constituents from water level time series has been introduced in a new appendix together with a worked example of harmonic analysis; and a real-life example is included of a design adapting to climate change. This

book is especially useful as an information source for undergraduates and engineering MSc students specializing in coastal engineering and management. Readers require a good grounding in basic fluid mechanics or engineering hydraulics, and some familiarity with elementary statistical concepts.

A History of Male Psychological Disorders in Britain, 1945-1980 Jan 15 2021 This book is open access under a CC BY license and explores the under-researched history of male mental illness from the mid-twentieth century. It argues that statistics suggesting women have been more vulnerable to depression and anxiety are misleading since they underplay a host of alternative presentations of 'distress' more common in men.

Supervision and Professional Development in Social Work Practice Aug 10 2020 Supervision and Professional Development in Social Work Practice aims to familiarize its readers with the current state of supervision in social work, provide them a common platform for reflection and action and thereby promote excellence in their respective learning, research and professional practice areas. It incorporates contributions by scholars, practitioners and students from various backgrounds, professional disciplines and countries. The ideas, concepts and practice frameworks discussed in this book are useful in any human service context. However, they need to be adapted with cultural sensitivity and appropriate levels of consultation and guidance to effectively challenge prevalent practice frameworks and support the embracing of new ideas to enhance professional and authentic engagement. The book utilizes several research studies, views, experiences and reflections, and includes numerous Voices from the Field, which provide diverse perspectives and viewpoints as well as practical help. This book will prove indispensable for academicians, practitioners, supervisors and

supervisees as well as postgraduate and advanced undergraduate students of social work, counselling, psychology and education.

Rhythms of Labour Apr 05 2020 Whether for weavers at the handloom, labourers at the plough or factory workers on the assembly line, music has often been a key texture in people's working lives. This book is the first to explore the rich history of music at work in Britain and charts the journey from the singing cultures of pre-industrial occupations, to the impact and uses of the factory radio, via the silencing effect of industrialisation. The first part of the book discusses how widespread cultures of singing at work were in pre-industrial manual occupations. The second and third parts of the book show how musical silence reigned with industrialisation, until the carefully controlled introduction of Music while You Work in the 1940s. Continuing the analysis to the present day, Rhythms of Labour explains how workers have clung to and reclaimed popular music on the radio in desperate and creative ways.

The DSM-5 in Perspective Oct 31 2019 Since its third edition in 1980, the Diagnostic and Statistical Manual of Mental Disorders (DSM) of the American Psychiatric Association has acquired a hegemonic role in the health care professions and has had a broad impact on the lay public. The publication in May 2013 of its fifth edition, the DSM-5, marked the latest milestone in the history of the DSM and of American psychiatry. In *The DSM-5 in Perspective: Philosophical Reflections on the Psychiatric Babel*, experts in the philosophy of psychiatry propose original essays that explore the main issues related to the DSM-5, such as the still weak validity and reliability of the classification, the scientific status of its revision process, the several cultural, gender and sexist biases that are apparent in the criteria, the comorbidity issue and the categorical vs. dimensional debate. For several decades the DSM has been nicknamed "The Psychiatric Bible." This volume would like to suggest another

biblical metaphor: the Tower of Babel. Altogether, the essays in this volume describe the DSM as an imperfect and unachievable monument – a monument that was originally built to celebrate the new unity of clinical psychiatric discourse, but that ended up creating, as a result of its hubris, ever more profound practical divisions and theoretical difficulties.

Science and Pseudoscience in Social Work Practice Nov 24 2021 "Science is a way of thinking about and investigating the accuracy of assumptions about the world. It is a process for solving problems in which we learn from our mistakes. Social work has a long history of social reform and helping efforts. Let us continue this by paying attention to the important message of this book. --Eileen Gambrill, PhD, School of Social Welfare University of California at Berkeley (From the Foreword) Although many psychosocial interventions used in social work practice have strong research evidence supporting their efficacy, a surprising number do not, potentially resulting in harmful outcomes. In this book, the authors cast a critical eye on the reality of commonly used scientific and pseudoscientific

practices in social work today. Stressing the need for separating research-based practices from those not supported by adequate levels of evidence, they examine the scientific and pseudoscientific bases for popular social work interventions used in a variety of treatment settings. The text examines the misuse of legitimate research and describes how social work education training can and should discourage pseudoscience. The concluding chapter describes pathways through which social work practice can become more firmly grounded in contemporary scientific research. This engaging book is intended for courses in critical thinking and evidence-based practice and is a valuable resource for all social work students and practitioners. Key Features: Promotes critical thinking regarding the evidence-based research--or lack thereof--behind a variety of social work interventions Written by renowned social work educators Addresses the history and characteristics of pseudoscience Examines pseudoscience practices in assessment and work with children, adolescents, adults, and individuals with developmental difficulties

Work Activity Studies Within the Framework of Ergonomics, Psychology, and Economics Jul 09 2020 Systemic-structural activity theory (SSAT), founded by Gregory Bedny, is a relatively new unified framework for the study of efficiency of human performance, equipment, and software design. This book presents new recently obtained data in the field of SSAT that can be used in the study of efficiency and complexity of human performance. With increased cognitive demands to task performance, psychological methods of study of human activity play an important role. New principles

and revised methods for the study of human work are supplemented by practical examples in manufacturing, construction industry, aviation, and human-computer interaction. Features: Presents new SSAT data Offers, for the first time, comparative analysis of studying efficiency and productivity from the perspective of ergonomics, psychology, and economics Includes examples of evaluation of economic efficiency of ergonomic innovations Provides advanced self-regulative models of activity and of all cognitive processes that describe strategies of task performance Introduces a new efficient method of morphological and analytical quantitative analysis Discusses new methods of evaluation of complexity and reliability of highly variable computerized and computer-based tasks Work Activity Studies Within the Framework of Ergonomics, Psychology, and Economics presents a comprehensive unified psychological theory that can be utilized as a general approach to the study of human activity not only for ergonomists and psychologists, but also for economists that study the efficiency of human performance.

Faculty Work and the Public Good Dec 02 2019 At a time when faculty roles are under great scrutiny and faculty work itself has an uncertain future, this book offers a new approach to examining academic professionalism. This collection of essays applies a philanthropic lens to contemporary debates and considers academic work completed out of a moral responsibility to the public good. It provides a counterpoint to narrow conceptions of appropriate faculty work as limited to the production of credit hours and research dollars and offers evidence that faculty can have a wider role both within and beyond the “ivory tower.” By examining faculty members’ many contributions, not only to students but to society-at-large, *Faculty Work and the Public Good* provides an alternate perspective on America’s colleges and universities that will help preserve and expand professorial contributions to the public good. Although not all faculty are philanthropically inclined, highlighting those who are will

help preserve valuable aspects of faculty work and encourage more such contributions to society. This volume is an essential read for higher education policymakers, trustees, and administrators; students and scholars of higher education and philanthropy; and individual faculty concerned about their profession. Contributors: Ann E. Austin, J. Herman Blake, Dwight F. Burlingame, Denise Mott DeZolt, Sean Gehrke, Audrey J. Jaeger, Adrianna Kezar, Jia G. Liang, Elizabeth Lynn, Michael Moody, Emily L. But you will never do it perfectly. Throw perfect out of your vocabulary. Just toss it out the window and keep on driving, because, sister, it ain't an option for you anymore. We've been fed a huge pack of lies. We've been told that we can bring home the bacon, fry it up in the pan, and feed our smiling, happy family with it. I am here to tell you that the quickest way to end up on a therapist's couch or crying into your glass of pinot noir at your girlfriend's house is to think that "perfect" and "working mother" belong in the same sentence.

They don't. No one has it all. Save yourself the doctor's bill and the AA meetings and just accept the fact that if you choose to work and be a mom, life will be far from perfect.

Or would you get them on the court and have them play? In basketball, the answer is easy&BAD:—you do both. So why teach politics only as a spectator sport? Senator Bob Graham believes that students should expand on their classroom learning about the political system: he spurs them to hit the court and actually play the game. If students work on an issue they care about, politics will become a meaningful and positive experience. This short, how-to guide takes students out of theoretical discussions of policy and into a world where they can affect change. Graham&BAD:'s goal is to have students identify a problem, and then walk them through each step from researching the issue, to getting others involved, to engaging the media. Each chapter starts with a real case, showing citizens tackling a step in the process, and ends with a summary checklist and a series of questions that help students put Graham&BAD:'s game plan in action. By offering students concrete guidance, an array of resources, and advice for troubleshooting and overcoming barriers, this compact user&BAD:'s guide gets students way beyond textbook learning. Thirty-five years ago, as a member of the Florida Legislature, Bob Graham took on the challenge of civic education for eighteen weeks at a Miami-area high school. His time as both a governor and a senator has only strengthened his resolve to pique students&BAD:' curiosity about politics and teach them to get what they want from government.

Chinese Economists on Economic Reform – Collected Works of Ma Hong Jun 07 2020 This book is part of a series which makes available to English-speaking audiences the work of the individual Chinese economists who were the architects of China's economic reform. The series provides an inside view of China's economic reform, revealing the thinking of the reformers themselves, unlike many other books on China's economic reform which are written by outside observers. Ma Hong (1920-2007) was one of the leading advocates for China's market-oriented reforms, one of the earliest scholars to adopt the concept of "a socialist market economy". Politically active from the 1930s, when he campaigned against the Japanese occupation, he held many important posts, notably President of the Chinese Academy of Social Sciences in the 1980s. He was particularly influential in the field of

industrial economics, putting to use his own experiences of managing industrial enterprises, and a strong advocate of the need for China's economic development to be stable. The book is published in association with China Development Research Foundation, one of the leading economic and social think tanks in China, where many of the theoretical foundations and policy details of economic reform were formulated.
